

Sealed Air®

BRAND PROTECTIVE PACKAGING

TempGuard Insulated Bags

SEALED AIR® brand TempGuard insulated bags protect temperature-sensitive and perishable goods in transit.

BENEFITS

Operational Efficiency

- Ships and stores flat, reducing freight costs and storage and warehouse space requirements
- Optimizes fulfillment processes while improving cube and dimensional weight due to its conforming, thin and lightweight material
- Convenient self-seal closure eliminates the need for staples or tape

Product Integrity

- Padded bags provides light cushioning while helping minimize damage during handling and transit
- Provides thermal protection throughout product transit
- Extends time a product can remain out of refrigeration
- Equipped with an adhesive self-seal, offering secure closure
- Compatible with gel packs and dry ice

Brand Experience

- Printing is available to enhance consumer experience (minimum order quantities apply)
- Made from paper and at least 25% recycled content for improved sustainability
- Curbside recyclable for added consumer convenience

CHALLENGE

Protection is vital, not only from damage, but from hot and cold temperatures that occur in transit. An environmentally-friendly solution is just as important - one that's made from recycled materials, reduces waste and can easily be recycled curbside.

SOLUTION

SEALED AIR® brand TempGuard insulated bags are the ideal short term cooling solution to help protect temperature-sensitive and perishable goods from harmful temperature fluctuations. Engineered to be tough and help extend the time a product can remain out of refrigeration, these insulated bags are the perfect sustainable solution to replace metallic insulated mailers.

Made from paper and at least 25% recycled content, TempGuard insulated bags are curbside recyclable for added consumer convenience and ease of disposal.

TempGuard Insulated Bags

SUSTAINABILITY

- Made from paper and at least 25% recycled content, and filled with a honeycomb die cut inner padding
- How2Recycle (H2R) certified curbside recyclable for added ease of disposal
- Excellent insulation properties help ensure perishable items arrive fresh, reducing food waste

MATERIAL

- Made from heavy-duty paper containing a honeycomb die cut inner padding
- Engineered with a 3-layer, gusseted design for added durability and ease of pack-outs
- Designed with surface protection for added water resistance to prevent leaks and cross contamination when transporting with other goods
- Available in an assortment of sizes in kraft paper (internal sizes)
 - Small - 15" L x 11.75" W (38.1cm x 29.8cm), 5.5" (14cm) Gusset
 - Medium - 17.25" L x 13.75" W (43.8cm x 34.9cm), 6.25" (15.8cm) Gusset
 - Large - 18.75" L x 16.5" W (47.6cm x 41.9cm), 7.75" (19.7cm) Gusset
- One-sided printing available for enhanced consumer experience
- Market leading performance testing available to help optimize the size and pack-out to best fit your specific needs
